CLEAN CARPETS FOR HEALTHIER FAMILY LIVING

After Cleaning Care:

After our Service Technician has cleaned your carpet some simple precautions should be observed for the best results:

- Please minimize traffic on the carpet and remember walking from a wet carpet onto a hard surface can be very slippery!
- For their health and safety please keep children and pets off recently cleaned carpet until completely dry.
- To avoid stains or rust spots, please don't remove any pads or blocks our technicians may have placed under furniture until the carpet is completely dry.
- If stain protection was applied after cleaning, drying time may be lengthened . Please allow 24 hours before heavy carpet use.
- Carpet drying time can vary widely due to the density of your carpet, humidity and the degree of soil. To speed drying, ventilate the area as much as outside weather allows and increase air circulation (turn on fans). Carpet drying time may vary from only two hours under ideal conditions to as much as 24 hours.
- When walking on the carpet use the FREE booties supplied to you by our technician.

Thank you for choosing
